

Make sure to get  
your checkup soon!

## Medical examination certificate for 2025

Students who have undergone a health checkup can receive the checkup results in the form of a medical examination certificate. This issuance will be the notification of the result. When the chest X-ray showed no findings, the certificate will be issued according to the following schedule. If you need a certificate, we recommend that you take a checkup as on an earliest date as possible. If you did not undergo a checkup, or if you did not complete the checkup including the web-based screening, a certificate will not be issued.

Examples for occasions when a certificate is required include a clinical training, a teaching practice, and job search, etc.

### How to obtain a medical examination certificate

To automatically issue certificates, you must apply online in advance. Certificates can be obtained for a fee from on-campus issuing machines or convenience stores.

The following people cannot be issued with a certificate from on-campus issuing machines and convenience store. If you wish to have a certificate issued, please contact the Health Counselling Service at your nearest Campus Life and Health Support Centre (each campus).

- Students whose chest x-ray results indicate that they need to be re-examined.
- Students affiliated to the School of joint Graduate School of Mathematics for Innovation.
- Non-regular students

Online Application
